Semester evaluations, Study Board for Cross-Cultural Studies (CCG and Tourism), Autumn 2015.

6 Feb. 2015

**CCG:**

The number and distribution of respondents – 89, 44 of these semester 7th semester – the rest 9th semester. For 7th semester this gives us a response rate on only 47% which is lower than we would have hoped for. It is therefore difficult to make any valid generalizations based on this evaluation.

63% spend more than 30 hours on their studies each week, which is a significant increase by 17% from the last Autumn semester evaluation. 13% report spending less than 20 hours per week on their studies. Considering that students are supposed to spend 37.5 hours per week on studying, these figures must still cause some concern. The Study Board has made study efficiency one of the strategic goals for the coming three years.

Respondents generally feel well-informed about goals and purposes of the programme modules, as well as practical information about the programme.

The majority of responding students are happy with (or indifferent about) the project formation process. Only 4 (10%) disagreed to this. An extremely high percentage (98%) completed their project as part of a group. It is a declared goal of the Study Board to promote group work as an integral part of the ‘Aalborg experience’, which makes this very satisfactory news. 76% feel project (team) work went well, only 8% that it didn’t.
